FITPULSE KNOWLEDGE BASE — FREQUENTLY ASKED QUESTIONS
Internal Reference for Support Agents

ACCOUNT & BILLING

Q: How do I change my email address?

A: Settings > Account > Email. Requires re-verification via the new email. Old email loses access immediately.

Q: I was charged twice this month.

A: Check if the customer has two active subscriptions (web + mobile can create duplicates). If confirmed duplicate charge, refund the duplicate immediately (auto-approve if under \$50). Log as billing bug — tag Engineering.

Q: How do I switch from monthly to annual?

A: Settings > Subscription > Change Plan. The switch happens at next billing date. Customer pays annual rate minus any remaining credit from current month.

Q: I cancelled but I'm still being charged.

A: Verify cancellation status in admin panel. If cancellation was processed, this is a billing system issue — refund the charge and escalate to Engineering. If cancellation was not processed (user error), walk them through the cancellation flow.

Q: Do you offer student discounts?

A: Yes — 30% off Pro plans with valid .edu email verification. Not available for Elite. Apply at fitpulse.com/students.

Q: Can I pause my subscription instead of cancelling?

A: Yes — Pro and Elite members can pause for up to 60 days per year. Settings > Subscription > Pause. Pausing stops billing and freezes the plan. Live coaching slots are not reserved during pause.

WORKOUTS & FEATURES

Q: How are workout plans personalized?

A: Based on the fitness assessment taken at signup (goals, fitness level, equipment available, time per session, injury history). Plans adapt weekly based on logged performance.

Q: Can I do workouts offline?

A: Pro and Elite members can download up to 20 workouts for offline use. Go to any workout > tap the download icon. Downloads expire after 30 days.

Q: My workout streak reset — can you fix it?

A: Streaks are based on server-synced data. If the streak broke due to a sync failure (check logs), we can manually restore it — escalate to Engineering with the user's last 7 days of workout logs. If the user genuinely missed a day, we cannot manually restore streaks per policy.

Q: How do live coaching sessions work?

A: Book via the app (Schedule tab). Sessions are 30 or 60 minutes, 1-on-1 video with a certified trainer. Pro gets 1/week, Elite gets unlimited. Cancel a session at least 2 hours before to avoid a no-show mark.

TECHNICAL

Q: What devices are supported?

A: iOS 15+, Android 11+, Web (Chrome, Safari, Firefox, Edge — latest 2 versions). Apple Watch and Wear OS for workout tracking.

Q: The app is using too much battery.

A: Disable background GPS tracking (Settings > Tracking > Background Location > Off). Also check if live heart rate monitoring is on — this uses Bluetooth continuously. Turning it off saves ~30% battery.

Q: I can't connect my Apple Watch / Wear OS device.

A: Ensure Bluetooth is on, both devices on same Apple ID / Google account. Unpair and re-pair. If still failing, check that Health / Google Fit permissions are granted for FitPulse. Known issue: Wear OS 4.1 has a pairing bug — workaround is to restart the watch before pairing.

Q: Videos won't play / keep buffering.

A: Minimum recommended: 10 Mbps for HD, 25 Mbps for live sessions. Check status.fitpulse.com for CDN issues. Try switching from WiFi to mobile data (or vice versa) to isolate. If on VPN, try disabling it — some VPNs throttle video.

COACHING

Q: Can I choose my own coach?

A: Elite members can browse and select their preferred coach. Pro members are auto-matched based on goals and availability.

Q: My coach didn't show up to a session.

A: Apologize sincerely. Offer 1 free bonus session (no approval needed). Log the coach ID and session time — report to Coaching Ops. If this is the 2nd+ reported no-show for this coach, flag as urgent.

Q: I want to report my coach for inappropriate behavior.

A: Thank the customer for reporting. Do NOT investigate or make judgments. Immediately escalate to Trust & Safety with: coach ID, session date/time, customer's description (verbatim). Confirm to customer: "This has been escalated to our Trust & Safety team who will investigate and follow up with you directly within 24 hours."

NUTRITION

Q: Is the meal plan medically reviewed?

A: Meal plans are designed by certified nutritionists but are NOT medical advice. Users with dietary restrictions, allergies, or medical conditions should consult their healthcare provider. This disclaimer must be included in any nutrition-related response.

Q: Can I customize my meal plan for allergies?

A: Yes — Settings > Nutrition > Dietary Preferences. Select allergens to exclude. The plan regenerates within 24 hours. Currently supported: gluten, dairy, nuts, soy, shellfish, eggs.
